

## PLANTS FROM Hugh Nunn Wholesale Ltd.

We are a specialist wholesale nursery offering a range of plants rarely available in garden centres. All are excellent garden plants that are hardy in the British Isles.

A family run business now based near Stamford in Lincolnshire, plants offered within the genera Trillium, Erythronium and Roscoea are ones that Hugh Nunn selected at his nursery in Harvington near Evesham. These were grown alongside a collection of hellebores which are known as 'Harvington Hellebores'. The prefix 'Harvington' is also associated with several hybrid forms of Trillium, Erythronium and Roscoea bred by Hugh.

Delphiniums always draw attention and those offered here are cutting-grown. They have all been awarded the Royal Horticultural Society's Award of Garden Merit (AGM).

Plants like Narcissus cyclamineus (species), Meconopsis sheldonii 'Slieve Donard', Sanguinaria canadensis f. multiplex 'Plena', Omphaloides cappadocica 'Cherry Ingram' and others are all choice plants that we hope will be of interest to you. They are grown in 9cm, 1 litre or 2 litre deep pots - please refer to the price list for availability.

We have limited stocks available each season but would be pleased to work with you to grow additional quantities where you see a market for them in the future.
